ABOUT CAREERTRONIC

At Careertronic, we are committed to accelerating your career with our world-class Full Stack Software Development Training, designed to empower you to thrive in the ever-evolving tech industry. Led by expert instructors and centered around hands-on learning, our program guarantees 100% placement support, providing a clear pathway to success. We offer comprehensive training in front-end and back-end development, website and mobile app development, UI/UX design, cloud computing, and DevOps, equipping you with the skills to build scalable, real-world applications.

What sets us apart is our focus on practical experience—work on live projects, develop a strong portfolio, and gain the confidence to showcase your work to top tech employers. With career development support and exposure to global job opportunities, Careertronic ensures you are ready to make an impact in leading tech companies worldwide. Join Careertronic today, build your portfolio, and unlock a future filled with exciting career possibilities in the global tech industry!

OUR AIM

At Careertronic, our aim is to equip students and professionals with the skills, real-world project experience, and industry insights needed to succeed in the tech world. We focus on providing comprehensive, hands-on training that prepares individuals to meet the evolving demands of the global tech industry, ensuring they are job-ready and confident in their abilities to excel.

ABOUT TRAINING PROGRAM

Overview

The **Full Stack Software Development Training Program** at Careertronic is a comprehensive, career-transforming course designed to equip individuals with **in-demand, industry-ready skills**. Our expert instructors guide students through **front-end and back-end development, UI/UX design, mobile and web app development, cloud computing, and DevOps**, ensuring a well-rounded understanding of modern software development.

What sets Careertronic apart is our **hands-on approach**, where participants work on **live projects**, allowing them to build a **professional portfolio** that showcases their real-world skills. With our **100% placement** support, we offer personalized career support to ensure students secure high-paying jobs at top tech companies globally. The program's focus on cutting-edge technologies and practical learning not only prepares you for the ever-evolving tech landscape but also gives you a competitive edge in the job market.

Join Careertronic today and unlock your pathway to a successful, global tech career!

Gain a thorough understanding of how to **build, deploy, secure, and scale applications** across the user interface, business logic, and database layers. Our course will equip you with essential skills to work with **front-end and back-end technologies, including coding and hands-on experience with capstone projects**. You'll dive deep into various techniques through independent and group projects, receiving individualized feedback from experienced mentors. Throughout the program, you'll participate in coding contests, sharpen your problem-solving skills, and access dedicated **career support and interview preparation**, ensuring you're ready for the job market. Whether you choose the expert instructor-led format or the flexible self-paced option, our course is designed to transform you into a **job-ready, versatile full-stack developer**. With a strong focus on building real-world skills, you'll graduate with a **portfolio that positions you for success in the tech industry**.

The **Full Stack Software Development Course** at Careertronic is tailored for **students and working professionals** eager to launch or accelerate their careers in technology. Designed with a focus on **employability, this comprehensive program combines world-class, instructor-led training with hands-on exercises, assignments, and real-time Projects**. You will build a strong project portfolio that showcases your ability to work on **real-world web and app development projects**, preparing you to ace interviews at top tech companies globally.

PROGRAM HIGHLIGHTS

Comprehensive Curriculum:

Master both front-end and back-end development, UI/UX design, mobile app development, cloud computing, and DevOps with practical, hands-on experience.

-  **Expert-Led Training:**
Learn from industry experts with years of real-world experience, providing you with high-quality, in-depth education that's aligned with current industry trends.
-  **Hands-On Live Projects:**
Work on real-world, live projects to build a professional portfolio that showcases your skills and makes you job-ready.
-  **Projects Integration:**
Gain practical coding experience on projects, simulating real-world development environments and enhancing your learning experience.
-  **Internship Opportunities:**
Get the chance to work with top tech companies through internships, where you can apply your skills in real business environments, gaining valuable industry experience.
-  **100% Placement Support:**
Receive dedicated career assistance, including resume building, interview coaching, and job placement guidance, ensuring you secure a top tech role.
-  **Live Projects & Competitions:**
Participate in challenging live projects and competitions that test your skills and make your portfolio stand out to employers.
-  **Global Career Opportunities:**
Graduate with a well-rounded skill set and portfolio, opening doors to high-paying tech roles in top global companies.
-  **Flexible Learning Formats:**
Choose between instructor-led live sessions or self-paced on-demand learning to suit your personal schedule.
-  **Career Guidance & Networking:**
Access exclusive career counseling, job fairs, and a strong network of industry professionals and alumni to enhance your job search.
-  **Beginner-Friendly Bootcamp:**
Perfect for students and working professionals, this bootcamp is designed to help anyone transition into the tech industry with confidence.

WHY JOIN THIS PROGRAM

Learning outcomes that set you up for Global success..

Industry-Relevant Skills

This course equips you with the latest tools and technologies in full-stack development, ensuring you're always at the forefront of industry trends. You'll gain proficiency in both front-end and back-end development, making you a versatile developer ready for diverse challenges.

Practical Application

Learn by doing! Through hands-on exercises, live project work, and internships, you'll apply your knowledge in real-world situations, ensuring you're job-ready upon completion.

Comprehensive Learning

From UI/UX design to back-end programming, mobile app development, cloud computing, and DevOps, this course offers a holistic approach to full-stack development, giving you a strong foundation in all key areas.

Networking Opportunities

Connect with mentors, industry experts, startup consultants, angel investors and ventures capitalists, expanding your professional network and opening doors to career opportunities in top tech companies and startups.

Career-Focused Support

Receive dedicated career guidance, interview preparation, startup guidance, and funding support with personalized feedback throughout the course, helping you secure a career in a competitive tech market.

Get JOB Offers Upto 12 LPA

Get a chance to apply for top recruitment companies with the hand-holding support of our placement team.

Launchpad for Career Growth

Whether you're just starting out or transitioning into a tech role, this course provides the skills, experience, and connections needed to propel your career in the thriving tech industry.

PROGRAM CURRICULUM

Website & Web Application Development

Introduction

- Introduction to Full Stack Development
- Objective: Understand the role of full-stack developers and the MERN stack ecosystem.
- Overview of Full Stack Development
- Introduction to the MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Client-Server Architecture and HTTP Protocol
- Development Workflow (Frontend, Backend, Database)
- Setting up a Development Environment (Node.js, MongoDB, VS Code, Git)

NODE.JS & EXPRESS.JS

- Introduction to Node.js and Express.js
- Objective: Learn backend development with Node.js and Express.js.
- Introduction to Node.js and NPM
- Basics of Express.js (Setting up routes, middleware)
- RESTful API concepts
- Setting up a basic Express server
- Connecting Node.js with MongoDB
- CRUD operations (Create, Read, Update, Delete)

MONGO DB DATABASE

- MongoDB – Database Design and Querying
- Objective: Understand how to work with MongoDB, a NoSQL database.
- Introduction to MongoDB and NoSQL Databases
- MongoDB Collections and Documents
- Using MongoDB with Mongoose (Model Creation, Querying, Relationships)
- Basic MongoDB Commands (insert, find, update, delete)
- Integrating MongoDB with Express
- Handling Database Connections

Authentication & Authorization

- Objective: Implement user authentication and manage secure sessions.
- User Authentication (JWT, Passport.js)
- Securing APIs with Token-Based Authentication
- Role-Based Authorization
- Managing Sessions and Cookies
- Best Practices for Security in Full Stack Applications

REACT.JS

- Introduction to React.js
- Objective: Learn the fundamentals of React.js for frontend development.
- Overview of React.js and Component-Based Architecture
- Creating Functional and Class Components
- JSX Syntax and Rendering Data
- Props and State
- Event Handling in React
- Introduction to React Router (Single Page Application routing)

Advanced React.js

- Advanced React.js Concepts
- Objective: Dive deeper into React.js for building dynamic UIs.
- React Hooks (useState, useEffect, useContext)
- Component Lifecycle Methods
- Managing State with Context API
- Form Handling and Validation
- Handling API Requests in React (Fetching Data)
- Error Boundaries and Debugging React Applications

Frontend + Backend Integration

- Building Full Stack Applications (Frontend + Backend Integration)
- Objective: Learn how to integrate frontend (React) with backend (Node/Express).
- Sending and Receiving Data between React and Express
- Fetching Data from Backend using Axios or Fetch API
- Handling API Responses and Error States in React
- Managing State with Redux (Optional)
- Setting up CORS for Frontend-Backend Communication

Express.js

- Building Full Stack Applications (Frontend + Backend Integration)
- Objective: Learn how to integrate frontend (React) with backend (Node/Express).
- Sending and Receiving Data between React and Express
- Fetching Data from Backend using Axios or Fetch API
- Handling API Responses and Error States in React
- Managing State with Redux (Optional)
- Setting up CORS for Frontend-Backend Communication

PROGRAM CURRICULUM

Styling and Frontend Design

- Objective: Improve the visual appeal of your frontend.
- CSS Flexbox and Grid Layout
- Styling React Components using CSS, SASS, and CSS Modules
- Introduction to Material-UI or Bootstrap
- Creating Responsive Web Designs (Media Queries)
- Integrating External APIs (e.g., Google Maps, Weather API)
- Creating Interactive UIs with React

Deploying Full Stack Applications

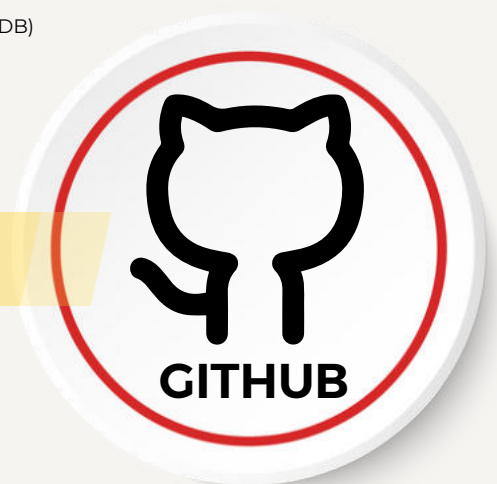

- Objective: Learn how to deploy MERN applications to the cloud.
- Deployment options for MERN applications (Heroku, AWS, DigitalOcean)
- Preparing a Node.js App for Production
- Setting up Environment Variables and Configurations
- Deploying the Backend (Express.js API) to Heroku
- Deploying the Frontend (React) to Netlify or Vercel
- Database Deployment with MongoDB Atlas

Testing Full Stack Applications

- Objective: Implement testing for both frontend and backend.
- Introduction to Testing in JavaScript (Jest, Mocha, Chai)
- Unit Testing Backend with Mocha/Chai
- Testing React Components with Jest and Enzyme
- End-to-End Testing with Cypress or Puppeteer
- Mocking API Calls for Testing
- Debugging and Troubleshooting Techniques

Final Project and Best Practices

- Objective: Build and deploy a full-stack application as a final project.
- Guidelines for Final Project (Combining React, Node, Express, and MongoDB)
- Code Organization and Project Structure Best Practices
- Version Control with Git/GitHub
- Performance Optimization in MERN Stack Applications
- Review of Advanced Features and Concepts
- Final Project Presentation and Peer Review

Mobile Application Development

Introduction

- Introduction to Mobile App Development & Flutter
- Introduction to mobile app development.
- Flutter and Dart basics: Setup, structure, and first Flutter app.
- Widgets, layouts, and navigation.
- Introduction to Dart programming language.
- Development environment setup for Flutter (Android Studio, VSCode).
- Assignments:
- Set up Flutter and Dart environment.
- Build a basic "Hello World" app.

Flutter UI & User Interactions

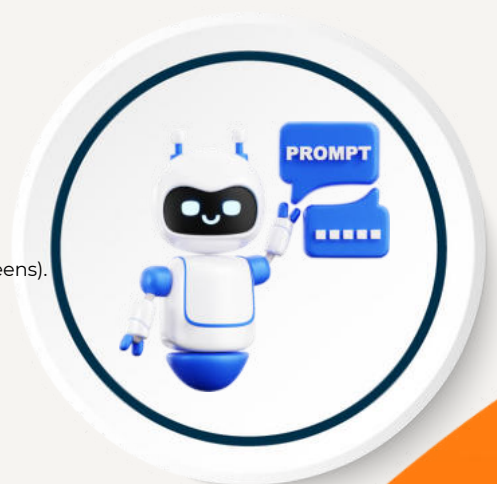

- Flutter UI and User Interactions
- Understanding Flutter widgets in-depth (Stateless vs. Stateful).
- Creating custom widgets and UI components.
- Handling user input (Forms, TextField, Buttons).
- Layouts and responsive designs (GridView, ListView, Column, Row).
- Styling and theming in Flutter.
- Assignments:
- Build a simple form-based UI app with basic validation.

Advanced Flutter UI & Navigation

- Advanced Flutter UI and Navigation
- Advanced navigation and routing (Named routes, Pass data between screens).
- Animation and transitions in Flutter.
- Working with images, icons, and custom assets.
- Introduction to Flutter packages and libraries.
- Assignments:
- Build a multi-screen app with navigation and animation.

Backend Development

- Introduction to Backend Development
- Introduction to RESTful APIs and Web Services.
- Overview of backend technologies: Node.js, Express, Firebase.
- Setting up a basic Node.js server.
- Connecting Flutter frontend with a simple backend (API calls using HTTP).
- Assignments:
- Create a simple API and connect it to the Flutter app using HTTP requests.

careertronics.in

PROGRAM CURRICULUM

Firestore for Mobile Apps

- Firestore for Mobile Apps
- Introduction to Firestore (Firestore, Firestore Authentication, Firestore Storage).
- Firestore Authentication for user registration and login.
- Integrating Firestore (cloud database) with Flutter for storing and retrieving data.
- Firestore Storage for handling media files (images, videos).
- Assignments:
- Implement Firestore Authentication and Firestore CRUD operations in a Flutter app.

State Management in Flutter

- State Management in Flutter
- Overview of state management approaches in Flutter (Provider, Riverpod, Bloc).
- Introduction to scoped model and Provider for managing state.
- Understanding reactive programming in Flutter.
- Using StreamBuilder and FutureBuilder for async data handling.
- Assignments:
- Implement state management in an app that communicates with Firestore.

Backend Services with Node.js

- Backend Services with Node.js (or Dart)
- Setting up Node.js and Express for backend development.
- Building RESTful API with Node.js and Express.
- Setting up a database (MongoDB, MySQL) for persistent storage.
- Deploying backend services to platforms like Heroku, AWS, or Google Cloud.
- Assignments:
- Build a custom API and deploy it using Heroku or another cloud platform.

Data Persistence & Offline Functionality

- Mobile App Data Persistence and Offline Functionality
- Local storage options in Flutter (SQLite, Shared Preferences).
- Working with offline-first design patterns.
- Implementing local data caching and syncing with the cloud.
- Handling app data and persistence with Flutter plugins.
- Assignments:
- Implement offline data persistence using SQLite in a Flutter app.

Real-Time Communication with Firebase

- Real-Time Communication with Firebase
- Introduction to Firebase Realtime Database.
- Implementing real-time data sync in Flutter apps.
- Building a real-time chat app with Firebase.
- Assignments:
- Build a real-time chat app using Firebase Realtime Database.

Testing & Debugging Flutter Apps

- Testing and Debugging Flutter Apps
- Unit testing and widget testing in Flutter.
- Using the Flutter DevTools for debugging.
- Setting up continuous integration and testing pipelines.
- Best practices for writing testable Flutter code.
- Assignments:
- Write unit and widget tests for a Flutter app.

Deployment and Publishing

- Deployment and Publishing
- Preparing Flutter apps for production.
- Setting up app icons, splash screens, and app configuration for Android/iOS.
- Deploying to Google Play Store and Apple App Store.
- Versioning and maintenance of mobile apps.
- Assignments:
- Prepare an app for deployment, including app store configurations.

Full-Stack Project

- Full-Stack Project
- Design and develop a full-stack Flutter app with custom backend (Node.js or Firebase).
- Integrating frontend and backend services.
- Implementing features like authentication, data storage, and real-time updates.
- Code reviews and optimization.
- Final project presentation and feedback.

Tools & Technologies

- **Frontend: Flutter, Dart, Flutter DevTools.**
- **Backend: Firebase, Node.js, Express, MongoDB, MySQL.**
- **Version Control: Git, GitHub.**
- **Deployment: Heroku, Firebase Hosting, Google Play Store, Apple App Store.**
- **Testing: Flutter test framework, Firebase Emulator.**
- **AI : Generative AI, Dialogflow, Figma with AI, and many more..**

PROGRAM CERTIFICATIONS

CERTIFICATE OF PROFESSIONAL EXPERIENCE

THIS CERTIFICATE PRESENTED TO :
Student Name

Date: [Insert Date]

This is to certify that _____ worked as a Full Stack Development Intern at [Company Name] from [Start Date] to [End Date]. During this time, [Employee's Name] made significant contributions to our development team and demonstrated exceptional technical and collaborative skills.

As a Full Stack Development Intern, [Employee's Name] was involved in a variety of projects that required both front-end and back-end development. Their responsibilities included:

- Front-End Development: Assisting in the design and development of responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and frameworks like [list any relevant frameworks like React, Angular, etc.].
- Back-End Development: Contributing to server-side logic, building and managing APIs, and working with databases like [list any relevant databases like MySQL, MongoDB, etc.].
- Collaborating with the Development Team: Working closely with senior developers, designers, and project managers to ensure alignment on project requirements, coding standards, and deadlines.
- Testing and Debugging: Identifying and fixing bugs, performing unit and integration tests, and ensuring the quality and functionality of web applications.

Throughout their internship, [Employee's Name] exhibited strong problem-solving abilities, attention to detail, and the ability to learn new technologies quickly. They displayed excellent communication skills and worked effectively in a collaborative environment, consistently contributing valuable insights to team discussions and brainstorming sessions.

We are pleased with the dedication, hard work, and progress demonstrated by [Employee's Name] during their internship at [Company Name]. We are confident that they have gained the skills necessary to excel in any full-stack development role and will be a valuable asset to any future team.

We wish [Employee's Name] the best of luck in their future endeavors and highly recommend them for any position related to full-stack development.

Sincerely,
[Your Name]
[Your Job Title]
[Company Name]
[Company Contact Information]

PROGRAM DETAILS

Program Duration

12 months which includes 6 Months Training + 6 Months (Live Project + Internship)

Eligibility Criteria

50% marks in 10th, 12th, and Graduation (for final-year students, marks of previous semesters will be considered)

Program Fee

Total Fees: ₹ 1,50,000 + GST

Step 1:

Apply for the Program –

Submit your application online to begin your journey.

Step 2:

Complete Your Application –

Fill out necessary details and submit documents.

Step 5:

Reserve Your Seat –

Finalize your enrollment and secure your spot in the program.

Step 4:

Earn a Scholarship upto 30% of the Program Fees -

If you score according to the following scores marking then you can gain a scholarship upto 30% of the Program Fees!

Step 3:

Clear the Assessment Test –

Demonstrate your aptitude and readiness for the program through an online assessment.

ADMISSION PROCESS

Score -

100 - 91 marks - 30% Scholarship

90 - 81 marks - 20% Scholarship

80 - 71 marks - 10% Scholarship

below 70 - No scholarship shall be awarded.

STARTUP ECOSYSTEM

Connecting Startups &
Investors for Success

We streamline startup investing by vetting high-potential startups, automating matchmaking, and aligning deals with your preferences—making investing smarter and easier.

Startup Consulting & Funding

- Expert guidance to turn your vision into a thriving business
- Access to strategic funding opportunities to scale rapidly

Pitch Decks & Financial Models

Compelling pitch decks and solid financial plans that attract investors.

Project Reports

Actionable insights to guide your decisions and attract funding.

ValidatemySaas

Validate your product idea before building—avoid costly mistakes

Take your startup to the next level with Careertronic, a revolutionary platform designed to connect you with over 36000+ verified angel investors and venture Capitalist.

Expert Business Report, Pitch Deck, Financial Projections preparation through IIT & IIM consultants

Validate Before You Build, Not After You Ship

We believe in the power of validation. Startups succeed when they build what people truly need starting with validation before launch.

Discover Tomorrow's Startups, Today

Our platform connects you with the most promising startups, giving you access to investment opportunities that could shape the future.

Let's Build the Future Together

Partner with us to turn your startup vision into a thriving business. Whether you're an entrepreneur or an investor, we connect the right people with the right opportunities.

Startups Are the Future

And the future belongs to builders. At Careertronic, we transform entrepreneurs into founders who are equipped to lead.
